

**Appendix 5:** Complete list of distinct morpho-species detected over 2-4 sampling years on the Cass (Cs), Ashley (As) and Aparima (Ap) Rivers. Unique taxa were identified to the lowest possible level and named as Recognisable Taxonomic Units (RTU). RTU ID = identification number applied to reference specimens; Guild = primary functional groups (*Detr* = detritivore, *Fung* = fungivore, *Herb* = herbivore, *Omni* = omnivore, *Para* = parasitoid, *Pred* = predator, *Ukn* = unknown); Trap types in which each taxon was detected are indicated by *P* = pitfall and *M* = malaise.
